Ghost Recon Future Soldier - PC Technical Support
Device is removed: Device hung due to badly formed commands.

The "**Device is removed: Device hung due to badly formed commands**" is a v1.1 Error on Ghost Recon Future Soldier that can result in freezes and black screens or crashes to desktop.

A temporary fix for this issue until Ubisoft patch the problem is to use [Nvidia Inspector](#) to underclock your graphics card.

An example for the Nvidia 580GTX card is shown below.

Orginal Setting : GPU = 795 MHz, MEMORY = 2004 MHz, Shader 1590 MHz

Suggested Setting : GPU = 700 MHz, MEMORY = 1800 MHz, Shader 1400 MHz

Unique solution ID: #1152
