

GRAW 2 - Gameplay Support

In Welcome to Juarez but when I go to the underground tunnel, my game crashes..consistently.

1.5 Patch caused this.

Crash caused by the spawning of the Grenade Launcher when you enter underground from either entrance.

Solution A: Do not ever go down there in campaign mission.

Solution B: Delete lines of code in mission 03 script that spawn the weapon.

Unique solution ID: #1093
