GRAW - Technical Support

What Are the Minimum and Recommended Specs for GRAW?

Minimum Requirements: Update

Processor: Intel P4 or AMD, 2 GHz
Operating System: Windows 2000/XP (only!)
Memory: 1GB RAM (*)
Disk Space: 4.5 GB
Graphics Card: 128 MB DX9.0c compatible card (GeForce 6200 / Radeon 9600 or higher) *See supported list below
Sound Card: DirectX 9.0c compatible
CD-ROM or DVD-ROM drive : X2 Read Speed
DirectX Version: 9.0c
Network: High-speed modem with 64 Kbits of data transfer upload rate for a client, 512Kbits of data transfer upload rate for a server on a full game.

Recommended Requirements:

Processor: Intel P4 or AMD 2.8 GHz
Operating System: Windows 2000/XP (only!)
Memory: 2 GB RAM (*)
Disk Space: 4.5 GB
Graphics Card: 256 MB DX9.0c compatible card *See supported list below
Sound Card: DirectX 9.0c compatible
CD-ROM or DVD-ROM drive : X2 Read Speed
DirectX Version: 9.0c
Network: High-Speed Modem with 128 Kbits of data transfer upload rate for a client, 512Kbits of data transfer upload rate for a server on a full game.

Notes

* The RAM specifications above are our own recommendations at GR.net based on reported issues caused by only having 512Mb of RAM. If you have less than 1GB of RAM there is a good possibility that there will be serious issues with aiming due to reticule sway.
